EXPERIENCE

Tokyo Tech Lab Viet Nam

Oct. 2024 – Present

Software Engineer

- Promoted to Software Engineer after six months as an intern, then delivered features end-to-end across three concurrent client products in teams of 5–15 engineers.
- Served as primary DevOps engineer on client projects, standardizing Terraform infrastructure-as-code and GitHub Actions pipelines into templates reused across multiple projects and environments.
- Drove features from technical design through code review to production release, spanning Next.js frontends, Nest.js APIs, and AWS infrastructure.
- Safeguarded release quality with Gitflow code reviews and type-safe shared API contracts generated from OpenAPI, reducing frontend–backend integration errors.
- Partnered with overseas product owners and designers in English to convert business requirements into sprint-level technical plans, and documented architecture to shorten new-joiner ramp-up.

Tokyo Tech Lab Viet Nam

Apr. 2024 – Oct. 2024

Software Intern

- Built Gitman, an internal Git repository management tool, from scratch with Vue.js, TypeScript, Nest.js, and MongoDB, and released it for internal team use.
- Joined the HRM platform build as a frontend developer in a team of 20, shipping Vue 3 and TypeScript workflow features into the company's production HR system.
- Shipped frontend and API features alongside senior engineers, resolving high-priority defects ahead of release deadlines.

PROJECTS

Kotae – AI Chatbot Platform

Oct. 2024 – Present

Role: Full-stack Developer | Client Project | Team of 14

Link: <https://kotae.ai/>

AI-powered chatbot SaaS platform for SME customer support, combining RAG-based knowledge Q&A with omnichannel messaging.

- Owned full-stack delivery of Kotae, Tokyo Tech Lab's primary client AI chatbot SaaS, across Next.js dashboards, Nest.js APIs, and AWS production deployments.
- Built Nest.js chat and RAG pipelines with OpenAI, LangChain, and MongoDB embeddings for knowledge-base Q&A.
- Shipped Shadcn UI dashboards and an embeddable widget with WordPress publish flows for third-party sites.
- Implemented real-time Socket.io messaging and Redis/Bull jobs for scraping, notifications, and async workloads.

Technology: Next.js · Nest.js · TypeScript · MongoDB · LangChain · OpenAI · AWS

Personal Portfolio

Sep. 2025 – Present

Role: Independent Developer | Team of 1

Link: <https://portfolio.anvd.io.vn/>

Multilingual personal portfolio site showcasing projects and professional profile, self-hosted with automated CI/CD.

- Built a multilingual portfolio (EN/VI) with Next.js, TypeScript, Tailwind CSS, next-intl, and Framer Motion.
- Deployed on a VPS with Docker Compose (Next.js standalone + Nginx HTTPS reverse proxy) and Watchtower auto-updates from Docker Hub.
- Automated CI/CD via GitHub Actions (lint, type-check, image build/push) with Telegram alerts for deploys and contact form submissions.

Technology: Next.js · TypeScript · Docker · Nginx · GitHub Actions · Telegram

StarLive – Live Streaming Platform

Jul. 2026 – Present

Role: Full-stack Developer | Team of 15

Paid live-streaming and 1:1 video-call platform with real-time per-minute billing and cross-app RTC integration.

- Delivered full-stack features across user, performer, and admin Next.js apps for a paid live-streaming and 1:1 video-call platform.
- Built Nest.js live/call session handling with idempotent Tencent webhook processing and per-minute point billing workers.
- Designed a Nest.js worker monorepo on AWS SQS for billing, notifications, OpenSearch sync, and media processing.
- Integrated Tencent RTC/chat and Socket.IO real-time clients shared across apps via a Turborepo common package.

Technology: Next.js · Nest.js · TypeScript · PostgreSQL · Redis · Tencent RTC · AWS

ERC Booking System – Clinic Scheduling Platform

Jan. 2026 – May. 2026

Role: Full-stack Developer / DevOps | Team of 5

Clinic scheduling platform with RBAC user management, automated multi-env infrastructure, and multilingual notification pipeline.

- Led DevOps for a clinic booking platform, provisioning multi-env AWS infrastructure with Terraform (VPC, ECS Fargate, Aurora, Redis, ALB, CloudFront, S3, SQS, SES).
- Owned GitHub Actions CI/CD for S3/CloudFront frontend deploys, ECR/ECS backend rollouts, and Liquibase database migrations across environments.
- Built Nest.js RBAC APIs and React admin features for user/role management with OpenAPI-synced clients.
- Implemented an async email pipeline via SQS workers and SES SMTP with multilingual Handlebars templates.

Technology: React · Nest.js · TypeScript · Terraform · AWS · PostgreSQL · GitHub Actions

HRM Platform – Human Resource Management

Apr. 2024 – Oct. 2024

Role: Front-end Developer | Team of 20

Internal human resource management system covering employee, timekeeping, and HR workflow modules.

- Built and refined HR workflows UI with Vue 3 and TypeScript for a production system serving 50 internal employees, improving usability and stability.
- Implemented Nest.js APIs and MySQL data layer for core HR modules.
- Fixed bugs and iterated UX based on internal user feedback.

Technology: Vue 3 · TypeScript · Nest.js · MySQL

SKILLS

Languages: TypeScript, JavaScript, Python, SQL

Frameworks/Libraries: Next.js, React.js, Vue.js, Nest.js, Node.js, Express.js, Vite, LangChain

Databases & Tools: MongoDB, MySQL, PostgreSQL, Redis, Postman, Jira, Figma

Cloud & DevOps: AWS, Docker, Kubernetes, GitHub Actions, Terraform, Linux, Grafana

PROFESSIONAL SUMMARY

Full-stack software engineer with 3+ years shipping production web applications in TypeScript, Next.js, and Nest.js. Delivers features end-to-end across three concurrent client products in teams of 5–15 engineers, from technical design through code review to AWS release. Serves as primary DevOps engineer on client work—Terraform infrastructure-as-code, Docker, and GitHub Actions CI/CD—and collaborates with overseas stakeholders in English.

EDUCATION

Dai Nam University

2020 – 2024

Bachelor of Science in Information Technology (GPA: 3.58 / 4.0)
