PROFESSIONAL SUMMARY

Full-stack software engineer with 2.5 years shipping production web applications in TypeScript, Next.js, and Nest.js, and primary DevOps engineer on client projects (Terraform, Docker, GitHub Actions, AWS). Delivered features end-to-end on three concurrent client products—an AI/RAG chatbot, real-time streaming with per-minute billing, and clinic scheduling—in teams of 5–15 engineers, working directly with overseas product owners and designers in English.

SKILLS

Languages: TypeScript, JavaScript, SQL

Frontend: Next.js, React, Vue 3, Tailwind CSS, Shadcn UI, Vite

Backend: Nest.js, Node.js, Express.js, REST/OpenAPI, Socket.io, LangChain

Databases & Cache: PostgreSQL, MongoDB, MySQL, Redis

Cloud & DevOps: AWS, Terraform, Docker, Nginx, GitHub Actions, Linux, Grafana

Practices & Tools: Agile Scrum, Gitflow, Code Review, Jira, Postman, Figma, Turborepo

EXPERIENCE

Tokyo Tech Lab Viet Nam

Software Engineer

Oct. 2024 – Present

- Promoted from intern within six months; now deliver features end-to-end on three concurrent client products in teams of 5–15 engineers, from technical design through code review to AWS release.
- Serve as primary DevOps engineer across client work, standardizing Terraform infrastructure-as-code and GitHub Actions pipelines into reusable templates now shared across client projects and environments.
- Eliminated a recurring class of frontend–backend integration defects by introducing type-safe API contracts generated from OpenAPI as a team-wide standard.
- Uphold release quality through Gitflow code review, and own the architecture documentation that shortened new-joiner ramp-up.
- Work directly with overseas product owners and designers in English, turning business requirements into sprint-level technical plans.

Software Intern

Apr. 2024 – Oct. 2024

- Delivered production features in Vue 3, TypeScript, and Nest.js across two internal platforms, and built one of them from the first commit through to company-wide release.
- Moved onto client-facing product work at the end of the internship.

PROJECTS

Kotae – AI Chatbot Platform · kotae.ai

Aug. 2024 – Present

Role: Full-stack Developer / DevOps | Tokyo Tech Lab (flagship client product) | Team of 14

Tech: Next.js · Nest.js · TypeScript · MongoDB · LangChain · OpenAI · AWS

AI-powered chatbot SaaS platform serving 10+ SME customers in production, combining RAG-based knowledge Q&A with omnichannel messaging.

- Owned end-to-end delivery from early product stages across Nest.js APIs, Next.js admin/embed UI, and AWS/GitOps (Docker/ECR, Helm, Terraform Cognito/S3).
- Built Nest.js chat/Socket.io session flows and Redis/Bull jobs for analytics aggregation and email on MongoDB + OpenAI/LangChain.
- Shipped Next.js chatbot configuration, knowledge-base training workflows, history/analytics dashboards, and an embeddable widget with WordPress publish flows.

StarLive – Live Streaming Platform

Jul. 2026 – Present

Role: Frontend Developer | Tokyo Tech Lab (client product) | Team of 15

Tech: Next.js · Nest.js · TypeScript · PostgreSQL · Redis · Tencent RTC · AWS

Paid live-streaming and 1:1 video-call platform with real-time per-minute billing and cross-app RTC integration.

- Built the admin live-monitoring console with multi-room Tencent TRTC playback, IM chat logs, viewer lists, and moderator actions (force kick/end/premium), shared across admin and production apps via a Turborepo package.
- Implemented recording review and livestream session analytics UIs—playback/detail with tags and comments, session stats, timeline charts, and consumption rankings.
- Delivered agency production-fee settlement workflows with bulk confirm/success-fail actions and EN/JA localization.
- Led Turborepo monorepo migration of the admin frontend (Next.js), extracting shared packages and aligning Docker/CI for workspace builds.

ERC Booking System – Clinic Scheduling Platform

Jan. 2026 – May. 2026

Role: Full-stack Developer / DevOps | Tokyo Tech Lab (client product) | Team of 5

Tech: React · Nest.js · TypeScript · Terraform · AWS · PostgreSQL · GitHub Actions

Clinic scheduling platform with RBAC user management, automated multi-env infrastructure, and multilingual notification pipeline.

- Led DevOps for a clinic booking platform, provisioning multi-env AWS infrastructure with Terraform (VPC, ECS Fargate, Aurora, Redis, ALB, CloudFront, S3, SQS, SES).
- Owned GitHub Actions CI/CD for S3/CloudFront frontend deploys, ECR/ECS backend rollouts, and Liquibase database migrations across environments.
- Built Nest.js RBAC APIs and React admin features for user/role management with OpenAPI-synced clients.
- Implemented an async email pipeline via SQS workers and SES SMTP with multilingual Handlebars templates.

HRM Platform – Human Resource Management

Apr. 2024 – Oct. 2024

Role: Front-end Developer | Tokyo Tech Lab (internal product) | Team of 20

Tech: Vue 3 · TypeScript · Nest.js · MySQL

Internal human resource management system covering employee, timekeeping, and HR workflow modules.

- Built and refined HR workflows UI with Vue 3 and TypeScript for a production system serving 50+ internal employees, improving usability and stability.
- Implemented Nest.js APIs and MySQL data layer for core HR modules.
- Fixed bugs and iterated UX based on internal user feedback.

Gitman – Internal Git Repository Management Tool

Apr. 2024 – Oct. 2024

Role: Full-stack Developer | Tokyo Tech Lab (internal tool) | Intern team

Tech: Vue.js · TypeScript · Nest.js · MongoDB

Internal tool for managing the company's Git repositories, built from scratch during the internship and released for company-wide use.

- Built Vue.js/TypeScript interface and Nest.js/MongoDB API features from the first commit through to company-wide internal release.

Personal Portfolio · portfolio.anvd.io.vn

Sep. 2025 – Present

Role: Independent Developer | Solo project

Tech: Next.js · TypeScript · Docker · Nginx · GitHub Actions · Telegram

Multilingual personal portfolio site showcasing projects and professional profile, self-hosted with automated CI/CD.

- Built a multilingual portfolio (EN/VI) with Next.js, TypeScript, Tailwind CSS, next-intl, and Framer Motion.
- Deployed on a VPS with Docker Compose (Next.js standalone + Nginx HTTPS reverse proxy) and Watchtower auto-updates from Docker Hub.
- Automated CI/CD via GitHub Actions (lint, type-check, image build/push) with Telegram alerts for deploys and contact form submissions.

EDUCATION

Dai Nam University

2020 – 2024

Bachelor of Science in Information Technology (GPA: 3.58 / 4.0)
